

Clear Waterways Organization (CWO)

May 18, 2014 REPORT: HIGH TIDE LINE BEACH CLEAN UP, AND FILTRATION

CWO removes small and large garbage pollution from high-tide lines at the beaches in order to remove the persistent pollution from our beach environments. The mixture of garbage contains: toxic plastic, sharp metal, and treated wood. Anything not identified as purely a beach item will be removed.

CWO provides information about the organization's performance and completion of beach areas.
